Fever Screening Thermal Solutions

Efficient and Safe Fever Detection For Your Workplace

Temperature-measuring, 'fever-screening' cameras provide a safe, non-contact, convenient and accurate way to operate a screening process for those who have a raised temperature, a symptom that is common in coronavirus (COVID-19).

With advanced detectors and algorithms, Connaught's Fever Screening Thermal Cameras can detect elevated body temperatures with accuracy up to +/-0.3°C.

They can be used for rapid and preliminary temperature screening in office buildings, factories, schools, colleges, medical centres and many more.

High Efficiency:

One second to detect a temperature in a person

Increased Safety:

Non-contact measurement to avoid physical contact

Protection and Reassurance:

Protect and provide reassurance to all users of your building

Visual and Alarm:

Provide an on-screen visual heat-map image and numerical temperature reading

Spot Potential Risks

A sounding alarm and alert window are shown if temperature is found to be raised above a normal level

Fast, Accurate and Non-Disruptive

Able to screen multiple, moving people at one time, from a safe distance

Fever Screening Thermal Products

With a choice of turret and bullet cameras, mounted or hand-held options, our range of fever screening products give the user ultimate flexibility:

Turret Camera

The Turret Camera features AI detection to reduce false alarms caused by other heat sources

- Short Range

Bullet Camera

The bullet camera features AI detection to reduce false alarms caused by other heat sources

- Long Range

Handheld Camera

With a wi-fi module, the handheld thermal camera can connect to a PC or a smartphone to notify operators when a person with an elevated temperature passes by

- Built in speaker for audio alarms
